## Sas visual analytics app documentation

Visualize and discover relevant connections in your data. Create and share interactive reports and dashboards, and use self-service analytics to quickly evaluate expected results for smarter, more data-oriented solutions. SAS® visual statistics help you get predicted values from forecasting models. This requires SAS Visual Analytics. Reports created using SAS Visual Analytics can be shared on tablets and phones using SAS® the Visual Analytics app, or can be shared in Microsoft Office programs using SAS® Office Analytics components. You can also create your own custom mobile app to display SAS Visual Analytics content using the SAS® SDK. SAS Visual Analytics offers a leading business intelligence and analytics solution to visually discover relevant relationships in your data, create and share interactive reports and dashboards, and use self-service analytics to quickly evaluate expected results and make smarter, data-driven solutions. SAS® visual statistics allow you to derive forecast values from forecasting models. SAS visual statistics require SAS Visual Analytics. Reports created using SAS Visual Analytics can be shared on tablets and phones using SAS® the Visual Analytics app, or can be shared in Microsoft Office programs using SAS® Office Analytics components. You can also create your own custom mobile app to display SAS Visual Analytics content using the SAS® SDK. The most recent editions of SAS® Viya® are: SAS Visual Analytics 8.3 SAS® Cloud Analytic Services (CAS) 3.4 Recent SAS 9.4 Editions: SAS Visual Analytics 7.4 SAS® LASR Analytic Server 2.82 New to SAS Visual Analytics? See SAS Visual Analytics SAS Viya Learning Center or SAS Visual Analytics for SAS 9.4 Learning Center News SAS Visual Analytics 8.3 for the SAS Viya update released in September 2018. A new reporting option is available. You can use the Summary field in the Options pane to enter the text that describes the report. Summary text can contain dynamic data element values based on report objects. Entity templates are now available. A new automated analysis object determines the most important key factors for a specific response variable. Bar charts, bubble plotters, line charts, pie charts, scatter plotters, and time series plots provide access to the SAS graphics accelerator, which allows visually impaired or blind users to explore data visualizations. Supported keyboard navigation. For more information, see SAS Visual Analytics 8.3: What's new. SAS Visual Analytics 8.3 for SAS Viya Released in July 2018. For example, the Actions pane has been redesigned to make it easier to add or modify actions. Existing For example, the pop-up menu now allows you to move objects; sort, change, or remove data items and print or share an object. New features are available for geographic maps and network analysis entities that display the background of the map. For example, you can set points on a map and draw routes between two points. There are new features in the data area. For example, you can connect to data sources, create aggregated data sources, and data views. There are new and improved calculations with new periodic intervals and a new AggregateTable operator. For more information, see SAS Visual Analytics 8.3: What's new. SAS Visual Analytics 7.4 SAS 9.4 Released April 2017 SAS Visual Analytics 7.4 includes the following updates: SAS Visual Analytics Designer has dynamic text, enhanced calculations, and improved prompt filter controls, settings, reporting links, and section links. The modern SAS Visual Analytics viewer (viewer) now has the most features that the classic viewer has had, so many users can switch to using a modern viewer. Enhanced printing features allow list tables to have page breaks in a PDF and display the filter context of filter controls in the filter. Another new feature allows you to print the same footer on each page of the report. Importing data from Teradata no longer requires a user name and password. Access the video collection How do I?. Sign up for a web class. Here are the most important suggestions for new SAS Visual Analytics users for SAS 9.4: Feel free to contact us if you have technical questions.
